C.U.R.E. leaps into Sustainable Development
Exciting new two-family housing in Newark's Central Ward

Embracing PSE&G's 5 Star Energy Efficiency, Horizon Village II is bigger and better, offering the finest example of craft, innovation and price to be found not only in Newark, but in the entire United States.

Each unit is 3 bedrooms, 1 ½ baths and loaded with exciting new features including brick face, ceramic tiles in baths, parking for two cars, pull down stairs to attic. The houses are gas-heated and central air-conditioned.

They are the product of JP Affordable Housing and C.U.R.E., who have combined on other projects in Newark and individually in Trenton, Paterson and Jersey City as well, providing hundreds of housing units for purchase.

The pride in craft of these carefully stick built houses is second to none. The special insulation and energy efficient furnace will mean a lot to society and to the purchasers in terms of energy conserved. But it is the price point that makes these splendid houses unique; each of these eleven has been sold for just \$96,900!

Ribbon cutting is scheduled for Wednesday, March 3 at 10:00 a.m. This will be celebrated by the participants including Mayor Sharpe James whose administration contributed with HUD in providing the critical homeownership grants, Summit Bank which provided the construction and end loans and Newark Council and Department of Development who greatly facilitated the project.
